1	1.093	1.056	3.280	3.240	.280	.230	47

Description	A circular flat washer that is significantly thicker than most other washers and has greater surface area than even fender washers.
Applications/ Advantages	Commonly used in dock and construction applications where thicker washers are required but a low carbon part is acceptable.
Material	Washers are punched from hot-rolled or hot-rolled and pickled steel.
Plating	Dock washers are provided in both plain and hot-dip galvanized finishes.
