FASTENERS

| Description | A circular flat washer that is significantly thicker than most other washers and has greater surface area than even fender washers. | | | | |
|-----------------------------|---|--|--|--|--|
| Applications/ Advantages | Commonly used in dock and construction applications where thicker washers are required but a low carbon part is acceptable. | | | | |
| Material | Washers are punched from hot-rolled or hot-rolled and pickled steel. | | | | |
| Plating | Dock washers are provided in both plain and hot-dip galvanized finishes. | | | | |
